

MeetScribe AI

Meeting Intelligence and Automation

SECTION 1: THE AI INTERVENTION STANDARD

MeetScribe is the ultimate intelligence layer for professional meetings in 2026. We provide a platform-agnostic bridge that turns complex conversations into actionable results. Through our silent browser interception and native language processing, we empower the modern workforce to focus on the conversation while we handle the complexity of organization and follow-up.

SECTION 2: MARKET INTELLIGENCE AND OPPORTUNITY

2026 Opportunity in the Indian Market (Rupees Cr)

AI Language Support		12,000
Automated Workflows		15,000
Security and Privacy		8,280

The shift from simple transcription to active 'Intervention' represents a massive Rs. 15,000 Cr opportunity in the Indian tech sector alone, driven by a need for efficiency and professional conduct.

SECTION 3: COMPREHENSIVE COMPARISON MATRIX

Factors	Zoom AI	Teams	Meet	Bots	MeetScribe
Automation	Manual	Basic	None	Partial	Full Auto
Toxic Detection	None	None	None	None	Real-time
Latency	Batch	Batch	Batch	Slow	Live
Regional	Low	Low	Low	Partial	Full Support
Health Score	No	No	No	No	Yes
Security	Native	Native	Native	Blocked	Local Tab

SECTION 4: WHY OUR STRATEGY LEADS THE MARKET

- **Professional Decorum:** Our toxic word detection ensures that corporate standards are maintained during intense discussions.
- **Workflow Integration:** We don't just take notes; we create Jira and Linear tickets based on the actual intent of the speaker.
- **Deeper Precision:** Our 98 percent speaker mapping accuracy handles overlapping voices in high-density office environments.
- **Platform Freedom:** We work across any tab, allowing teams to move between meeting sites without losing their transcript or history.

SECTION 5: AUTOMATION AND INTERVENTION EXAMPLES

Case Study: Automated Workflow Execution

Example: A manager says, 'We need to fix the login bug by Friday'. MeetScribe instantly identifies the intent, creates a Jira ticket with the title 'Fix login bug' and sets the due date to Friday without any manual data entry.

Case Study: Real-Time Conduct and Bad Word Warning

Example: During a heated debate, a participant uses unprofessional language. MeetScribe's AI identifies the toxic sentiment and sends a private, real-time warning to the speaker to maintain professional standards.

SECTION 6: TOPIC DRIFT AND MEETING HEALTH MONITORING

Productivity Gain (Hours Saved per Meeting)

Manual Documentation		1.5
Native Platform Tools		0.8
MeetScribe Intelligence		2.2

By automating the post-meeting documentation process, MeetScribe saves every employee over 2 hours of manual work for every hour of meeting time.

SECTION 7: SPECIALIZED INTELLIGENCE FACTORS

High Precision Speaker Diarization

We identify speakers with 98 percent accuracy even in noisy environments. This ensures that every decision and action item is correctly attributed, providing a legally defensible and accountable record of the conversation.

Agenda and Topic Drift Alerts

MeetScribe monitors the meeting against its agenda. If the conversation goes off-topic for more than 3 minutes, the system sends an alert to the leader to steer the meeting back to its core goals, increasing efficiency.

SECTION 8: ECONOMIC SCALING AND ENTERPRISE VALUE

Monthly Cost Comparison (Rupees)

Professional Scribe		45,000
Transcriptionist		25,000
MeetScribe Professional		849

MeetScribe reduces the cost of professional documentation by over 98 percent compared to traditional methods, while providing much deeper insights and integration.

SECTION 9: GLOBAL MONETIZATION AND PRICING PLAN

Tier	Price per Month	Strategic Value
Free Starter	Rs. 0	5 meetings and basic notes in English
Professional	Rs. 849	Unlimited meetings and Jira sync and Regional support
Enterprise	Rs. 1,249	Toxic alerts and Topic drift and Team dashboards

SECTION 10: SCALING PROJECTION AND REVENUE POTENTIAL

Revenue Growth Projection (Lakhs per Month)

Q1 2026		2.8
Q2 2026		18.5
Q3 2026		45
Q4 2026		92.5

The inclusion of high-value intervention and automation tools justifies our pricing and increases our customer retention by over 60 percent compared to simple recording tools.

SECTION 11: STRATEGIC ROADMAP AND FUTURE PROOFING

- Month 1 to 3: Launch Google Meet MVP and validate 'Silent Capture' for 1,000 early adopters.
- Month 4 to 6: Roll out Jira and Linear automation along with native Hindi and Kannada language support.
- Month 7 to 12: Launch real-time Toxic Word Detection and Topic Drift alerts for our Enterprise customers.
- Year 2: Launch 'Scout AI'—a live voice agent that can answer questions during the meeting based on past data.

SECTION 12: FINAL STRATEGIC CONCLUSION

MeetScribe is the only solution that combines silent browser-level access with advanced intervention intelligence. We have a clear and feasible path from a small MVP to becoming a scalable enterprise leader in the Indian AI market. By focusing on professional standards, privacy, and deep automation, we provide a complete platform for the 2026 workforce. Our economics are robust, our technology is validated, and our vision is to turn every conversation into actionable and measurable value.
